UTA-0856E Reference Rod 205 mm Long with 6 mm Tips UTA-0858 Reference Rod, 205 mm Long with 8 mm Tips

Standards

EN 1367-4; UNI 8520-22

The Three Gang Shrinkage Mould is used for the determination of the effect of aggregates on the drying, shrinkage and length change of hardened concrete when used together with the UTEST Length Comparators (UTCM-0200, UTCM-0210 or UTC-1170).

The mould is matchmarked and protected with anti-corrosion oil. Reference rod and spare steel inserts should be ordered separately.

Shrinkage Mould is supplied complied with the steel inserts screwed on.
