Calipers are useful devices for material testing applications which are used to measure the distance between two opposing sides of an object when used in combination with a ruler. UTEST offers Analog and Digital Calipers covering a range of 150 mm - 1000 mm.

A Micrometer, sometimes known as a micrometer screw gauge, is a device incorporating a calibrated screw used widely for precise measurement of small distances. UTEST offers a high quality analog micrometer 25-50 scale with 0.001 mm readability.
